Vol. IV. Experimental Wireless & The Wireless Engineer 1927

I. GENERAL INDEX.

PAGE

Abstracts and References ... 49, 115, 175, 242, 305, 368, 440, 502, 571, 634, 692, 761
Acoustic Problems of Microphones and Loud-speaker (*I.E.E. Discussion*) 106
Aerial, Approximate Theory of the Flat Projector, J. A. Fleming 387
(Correspondence) 704
Aerial, Horizontal Hertzian for Transmission, M. G. Scroggie 143
Aerial Systems employing Series Tuning Condensers, Resultant Capacity of, W. H. F. Griffiths 206
Aerial Systems, Calculations of the Polar Curves of Extended, E. Green 587
Aerials, Receiving, Theory of, F. M. Colebrook 657
Alignment Method in Linear Valve Characteristic Fields, E. A. Barclay 261
Alterations to the Modulating Panel at 2LO, E. Green, J. L. Hewitt, and T. G. Petersen 467
Amateur Long-Distance Work, H. N. Ryan 41
Amplification, A new Development in Resistance, F. M. Colebrook 195
(Correspondence) ... 304, 380, 515, 581
Amplification of Small Currents by means of the Thermo-Relay and Photo-Electric Cell, J. Taylor 627
(Correspondence) 706, 760
Amplifiers, The Performance of, P. K. Turner 77
Amplifiers (Editorial) 65
Amplifiers (Correspondence) 187
Amplifier Coupling Design, A Graphical Method, M. G. Scroggie 733
Approximate Theory of the Flat Projector (Franklin) Aerial, J. A. Fleming ... 387
(Correspondence) 704
Atmospheric and Transatlantic Telephony, A New Directional Polar Curve, Lt.-Col. A. G. Lee (*I.E.E. Wireless Section*) ... 757
Audio-frequency Problem (Correspondence) 241
Audio-Transformer Problem (Correspondence) 186, 301, 379, 420, 515, 581, 705

Battery Charging, A Reed Rectifier for, C. O. Browne 567
Battery Eliminators, or Appliances for the Operation of Radio Receiving Circuits by Energy Derived from Electric Supply Mains, P. R. Coursey and H. Andrews (*I.E.E. Paper*) 271
Beam System, Approximate Theory of the Flat Projector (Franklin) Aerial, J. A. Fleming 387

PAGE

Beam System in U.S.A., Rocky Point Station (Illustration) 714
Book Reviews :
Radio Frequency Measurements, E. B. Moulin 108
Elektrische Fernschen and Telehör, D. von Mihaly 110
Filtres Électrique, P. David 110
Bau von Widerstands-Verstärkern, M. von Ardenne 110
Alternate Current Rectification, L. B. W. Jolley 110
Les Ondes Electriques Courtes, R. Mesny... 159
The Elements of Radio Communication, O. F. Brown 212
Electrical Condensers, P. R. Coursey ... 270
Wireless Loud-speakers, N. W. McLachlan 378
Navigational Wireless, S. H. Long ... 566
Experimental Radio, R. R. Ramsay ... 566
Italian Year Book and Directory ... 626
Transformatoren-Verstärker, Muller and von Ardenne 760
Die Elektronenröhre, Forstmann and Schramm 760
Faschenbuch der Drahtlosen Telegraphie und Telephonie, Dr. F. Banneitz ... 760
Broadcast Receivers, the Purpose and Design of (*I.E.E. Discussion*) 166
Broadcast Reception, Tramway Interference with (Editorial) 386

Catalogue Reviews :
Quartz, A. Hinderlich 771
Low-frequency Amplification, R.I. and Varley Co. 771
Calculation of the Polar Curves of Extended Aerial Systems, E. Green 587
Capacity, Resultant, of Aerial Systems employing Series Tuning Condensers, W. H. F. Griffiths 206
Classification of Articles and Abstracts (Editorial) 2
Coil Impedance Diagrams, Some New, W. A. Barclay 87
Condensers, The "Law Correction" of Variable Air, W. H. F. Griffiths ... 479
Condensers, Variable Air, Notes on the Accuracy of, for Wavemeters, W. H. F. Griffiths 754
Constant Frequency Source and its Frequency Measurement, S. W. C. Pack ... 535
Cooled Anode Valves and Lives of Transmitting Valves, W. J. Picken (*I.E.E. Paper*) 362

PAGE

Correspondence ... 58, 123, 186, 241, 301, 379, 419, 514, 580, 626, 704, 760
Coupling between Loop and Beating Oscillator Circuits in a Superheterodyne, Some Notes on the Effect of, E. H. Ullrich and A. G. Reeves 652
Coupling, Amplifier, A Graphical Method of Design, M. G. Scroggie 733
Crystals, Quartz, and their Practical Application to Wireless Circuits (*R.S.G.B. Paper*), A. Hinderlich 29
Crystal, Quartz, Stabilisation of Transmitters (Correspondence) 188

Delineation of Alternating Current Wave Forms, H. A. Thomas 51
(Correspondence) 241
Description of a Valve Wavemeter with a Range of 10 to 20,000 metres, F. M. Colebrook 722
Design and Construction of a Superheterodyne Receiver, P. K. Turner ... 286, 339, 402
(Correction Note) 568
Diaphragms, The Vibration of Loud-speaker (Editorial) 713
Dielectric Losses and Permittivity at Radio Frequencies, Notes on, R. M. Wilmotte 529
Directory of Sources of Special Information (Correspondence) 303

Eclipse (Editorial) 321
Eclipse, Radio Research during the ... 381
Eclipse, Solar, and its Effect on Radio, H. de A. Donisthorpe (*R.S.G.B. Paper*) 293
Editorial:
A Simple Method of Measuring Modulation 1
Classification of Articles and Abstracts ... 2

Experimental Confirmation of the Influence of a Low-resistivity Layer Subsoil on the Forward **Inclination of** Radio **Waves.**—J. Cairns, **p. 504**

Inclinaison des Ondes et Systèmes Dirigés (**Inclination of waves** and directional systems).—L. Bouthillon, **p. 305**

The **Intensity of the Radiation** from a Source of Electric Waves when the Electric Constants of the Medium in the Neighbourhood of the Source are different from the Electric Constants at a Distance from it.—H. Macdonald, **p. 369**

On the Radio Field **Intensity of Radiation** Time Signals sent out by the Pearl Harbour Station, observed at Tokio.—T. Minohara, **p. 441**

On Wireless **Interference Phenomena** between **Ground Waves** and Waves deviated by the **Upper Atmosphere.**—E. V. Appleton and M. Barnett, **p. 115**

Ionisation in the **Upper Atmosphere.**—S. Chapman, **p. 49**

Ionisation, p. 115

Über den durch die Hess'sche Höhenstrahlung Bedingten Ionisations—und Leitfähigkeitszustand der höheren Luftschichten (On the state of **ionisation** and **conductivity** of the upper layers **of the atmosphere**, brought about by the Hess vertical radiation).—H. Benndorf, **p. 177**

Phase and Group Velocities in an **Ionised Medium.**—G. W. O. Howe, **p. 369**

Die Täglichen Schwankungen des Ionisationszustandes der Heaviside-Schicht (Daily variations of the state of **ionisation** of the Heaviside layer).—H. Lassen, **p. 441**

Transmission of Electric Waves through the **Ionised Medium**.—T. L. Eckersley, **p. 571**

Ionisation in the **Upper Atmosphere.**—E. O. Hulburt, **p. 634**

The Existence of more than one Ionised Layer in the **Upper Atmosphere.**—E. V. Appleton, **p. 635**

Long-wave radio **Measurements** at the Bureau of Standards in 1926, with some comparisons of **Solar Activity** and Radio Phenomena.—L. W. Austin, **p. 761**

Magnetic Storms and Wireless Communication, **p. 49**

Magnetic Storms and Wireless Communication.—T. L. Eckersley, **p. 116**

Magnetic Storms and Wireless Transmission.—E. V. Appleton, **p. 306**

Magnetic Storms and Wireless Transmission, **p. 504**

Über die Eindeutigkeit der Lösung der Maxwellschen Gleichungen (On the unambiguousness of the solution of **Maxwell's equations**).—A. Rubinowicz, **p. 178**

La Lune Influence-t-elle les Transmissions Radioélectriques ? (Does the **moon** affect radio transmission ?).—P. Vincent, **p. 115**

Einige Folgerungen aus den Feldgleichungen des schwingenden Dipols (Some consequences of the field equations of the **oscillating dipole**).—F. Pollaczek, **p. 116**

Penetration of Radio Waves.—A. Eve and D. Keyes, **p. 572**

Penetration of Radio Waves.—A. Eve, D. Keyes and E. Denny, **p. 692**

Die Ausbreitung der Elektrischen Wellen, insbesondere die Gerichtete Ausbreitung (The **propagation** of electrical waves, particularly directional propagation).—F. Kiebitz, **p. 49**

Wave **Propagation** in Overhead Wires with Ground Return.—J. Carson, **p. 52**

Electric Waves and their **Propagation.**—E. Rutherford, **p. 116**

Die Ausbreitung der Elektromagnetischen Wellen (The **propagation** of electromagnetic waves).—A. Sacklowski, **p. 242**

Über die Ausbreitung der Wellen in der drahtlosen Telegraphie (The **propagation** of waves in wireless telegraphy).—A. Sommerfeld, **p.** 243

Effect of a large Number of Receiving Aerials on the **Propagation** of Wireless waves.—R. Barfield, **p. 244**
Expériences sur la Propagation des Ondes Radiotélégraphiques en Altitude (Experiments on the **propagation** of radio waves at an altitude).—P. Idrac and R. Bureau, **p. 388**
Sur la Propagation des Ondes Électromagnétiques autour de la Terre (On the **propagation** of electromagnetic waves around the heart).—H. Gutton and J. Clément, **p. 388**
Propagation, p. 441
La Propagation des Ondes Électromagnétiques (**Propagation** of electro-magnetic waves).—Com. Metz, **p. 572**
Expériences sur la Propagation des Ondes Radiotélégraphiques en Altitude (Experiments on the **propagation** of radio waves at an altitude).—P. Idrac and R. Bureau, **p. 572**
Sur les Propriétés Diélectriques des gaz Ionisés et la Propagation des Ondes Électromagnétiques dans la Haute Atmosphère (On the dielectric properties of ionised gases and the **propagation** of electro-magnetic waves in the **upper atmosphere**).—H. Gutton and J. Clément, **p. 572**
Propagation of Periodic Currents over a System of Parallel Wires.—J. Carson and R. Hoyt, **p. 696**
Considerazioni sulla Propagazione delle Onde Elettromagnetiche (Discussion of the **propagation** of electro-magnetic waves).—G. Pession, **p. 761**
Zur Fortpflanzung Elektromagnetischer Wellen längs Leitern (On the **propagation** of electro-magnetic waves **along conductors**).—E. Roessler, **p. 635**
Au Sujet de la Nouvelle Formule de Propagation de Kiebitz (On Keibitz's new **propagation formula**).—R. Mesny, **p. 175**
Calculation of **Radiation Field** of rotational symmetry.—F. Kiebitz, **p. 49**
Eine Ergänzung zur Theorie des rotations symmetrischen Strahlungsfeldes (Supplement to the theory of the **radiation field** of rotational symmetry).—E. Spenke, **p. 243**
Zur Berechnung des rotations symmetrischen Strahlungsfeldes (Calculation of the **radiation field** of rotational symmetry).—M. Willstätter, **p. 761**
Refraction of Electro-magnetic Waves round the Earth's Surface.—J. McPetrie and R. Wilmotte, **p. 244**
Short Wave Tests, **p. 49**
General Electric **Short Wave** Test Results.—M. Prescott, **p. 49**
Über die Ionisation der Atmosphäre und ihren Einfluss auf dei Ausbreitung der kurzen elektrischen Wellen der drahtlosen Telegraphie (On the **ionisation** of the atmosphere of the **short** electric **waves** of wireless telegraphy).—H. Lassen, **p. 115**
Communication Test on **Short Waves** across the Pacific.—T. Nakagami and T. Kawahara, **p. 115**
Eine Ursache der Änderung des Polarisationzustandes kurzer Wellen (A cause of the alteration of the state of polarisation of **short waves**).—N. von Korshenewsky, **p. 175**
Neues über die Ausbreitung von kurzen Wellen (New results on the propagation of **short waves**).—E. Quäck, **p. 175**
Tests of Radio Propagation on **Short Waves** lengths.—M. Prescott, **p. 243**
On the Wireless Beam of **Short** Electric **Waves** (IV).—S. Uda, **p. 306**
Short Wave Wireless Telegraphy.—T. Eckersley, **p. 306**
On the Wireless Beam of **Short** Electric **Waves** (V) (High angle radiation of short-wave beam).—S. Uda, **p. 306**
The **Short-wave** Echo Effect, **p. 369**
Short-wave telephony, **p. 369**
Expériences sur la Propagation des Ondes Courtes (Experiments on the propagation of **short waves**).—A. Colmant, **p 440**
Short Wave Receiving Tests across the Pacific.—T. Nakagami, **p. 441**
La Notion Experimentale d'une Surface de Réference dans la Propagation des Ondes Courtes (Empirical idea of a surface of reference in the propagation of **short waves**).—R. Bureau, **p. 502**
Remarque sur la Propagation des Ondes Courtes à Distance Fixe (Note on the propagation of **short waves** over a given distance).—A. Jouffray, **p. 502**
Note sur Certaines Anomalies dans la Propagation des Ondes Courtes (Note on certain anomalies in the propagation of **short waves**).—R. Bureau, **p. 503**
Anomalies de Longue Durée dans la Propagation des Ondes Courtes (Anomalies of long duration in the propagation of **short waves**).—R. Bureau, **p. 503**
Propagation of **Short Waves** around the Earth, **p. 504**
High Angle Radiation of **Short** Electric **Waves**.—S. Uda, **p. 504**
On ionisation of atmosphere and its influence on propagation of **short** wireless **waves, p. 504**
Short-Wave Wireless Telegraphy.—T. L. Eckersley, **p. 571**
Weitere Mitteilungen über die Ausbreitung von Kurzwellen (Further results on the propagation of **short waves**).—E. Quäck, **p. 634**
Propagation of **Short Waves, p. 692**
Ein Sendeverfahren für kurze Wellen (A method of transmitting for **short waves**).—N. von Korshenewsky, **p. 242**
On the Nature of Wireless **Signal Variations**.—I.—E. V. Appleton and J. A. Ratcliffe, **p. 571**

Über Modulationslinien beim Röhrensender (On **modulation** lines in the case of **valve transmitters**).—W. S. Pforte, **p. 695**

Sur les Oscillations de Barkhausen obtenues avec des Lampes Françaises (On the Barkhausen **oscillations** obtained with French valves).—E. Pierret, **p. 574**

Zieherscheinungen beim Lichtbogensender (**Oscillation** hysteresis phenomena in the case of arc transmitters).—H. Winkler, **p. 695**

Abhangigkeit der An- und Abschwingvorgänge des Röhrensenders von den Betriebs-Bedingungen (Dependence of the phenomena of growth and decay of **oscillation** in the **valve transmitter** upon the working conditions).—W. S. Pforte, **p. 763**

Intermittent Valve **Oscillators.**—L. Taylor, **p. 308**

Calculations of the **Polar Curves** of Extended Aerial Systems.—E. Green, **p. 695**

Discussion on **Radiation Resistance** of a Vertical **Antenna** (Levin and Young).—S. Ballantine, **p. 371**

Discussion on Field Distribution and **Radiation Resistance** of a Straight, Vertical, Unloaded **Antenna** Radiating at one of its Harmonics (S. Levin and C. Young).—O. Roos, **p. 507**

Die Strahlung der komplizierten rechtwinkeligen Antennen mit gleichbeschaffenen Vibratoren (The radiation of complicated **rectangular antennæ** with similarly disposed vibrators).—M. Bontsch-Bruewitsch, **p. 179**

Zur Konstruktion der Radiospiegel (Construction of radio **reflectors**).—W. Tatarinoff, **p. 179**

Short Waves, p. 117

Weitere Untersuchungen mit dem Zweiröhrenund Vielröhrengenerator kurzer elektrischer Wellen (Further investigations with the two and multiple **valve generator** of **short** electric **waves**).—M. Grechowa, **p. 246**

Short Waves, p. 444

Nouvelle Antenne Directive Simple pour Ondes Courtes (New simple directional **antenna** for **short waves**).—H. Chireix, **p. 574**

Short-Wave Transmissions, **p. 574**

Some Practical Aspects of **Short-Wave** Operation at **High Power.**—H. E. Hallborg, **p. 637**

Korte Golfzenders in het algemeen en die voor de verbinding Nederland-Curaçao in het bijzonder (**Short wave** transmitters in general and those for the service, the Netherlands-Curaçao in particular).—G. Schotel, **p. 695**

Zur Theorie der Seitenbänder (On the theory of **side bands**).—R. Hiecke, **p. 178**

Zur Theorie der extremen Schnelltelegraphie (On the theory of extremely high-speed **telegraphy**).—W. Ludenia, **p. 308**

Télégraphie et Téléphonie Multiplex sur Ondes Courtes (Multiplex **telegraphy** and **telephony** on **short waves**).—M. Veaux, **p. 444**, also **p. 507**

Some Equipment used in Transatlantic Radio **Telephony, p. 308**

Telephony, p. 444

Secret Radio-**telephony** Systems.—O. F. Brown, **p. 507**

Simultaneous Production of a Fundamental and a Harmonic in a Tube Generator.—H. Walls, **p. 248**

Vacuum Tubes as Oscillation Generators.—D. Prince and F. Vogdes, **p. 507**, also **p. 246**

Valve Generators, p. 574

Rohrensender-Schaltungen, insbesondere für kurze Wellen (**Valve transmitter** circuit arrangements, especially for **short waves**).—W. Kummerer, **p. 117**

Die Rückwrikung bei fremdgestenesten Röhrensendern (Back action in externally modulated **valve transmitters**).—W. Kummerer, **p. 371**

Étude Experimentale du Fonctionnement d'un Triode Emetteur (Experimental investigation of the operation of a triode transmitter).—R. Jouaust, **p. 507**

Valve Transmitters, p. 695, also **p. 763**

RECEPTION.

The Performance of **Amplifiers.**—P. K. Turner, **p. 180**

Un Amplificateur H.F. à Bigrilles à Commande Unique (A double-grid H.F. **amplifier** with a single control).—R. Barthélemy, **p. 248**

The Performance of an Intermediate Frequency **Amplifier.**—M. Scroggie, **p. 574**

L'Amplification sans Lampe (Amplification without a valve).—F. Michaud, **p. 637**

Sur les Applications d'un Type Particulier d'Amplificateur à Réaction (On the applications of a particular type of **amplifier** with reaction).—P. Lejay, **p. 696**

The Amplification of Small Currents by means of the Thermo-Relay and the Photo-Electric Cell.—J. Taylor, **p. 696**

A Floating **Beat Note.**—F. Anderson, **p. 118**

The Performance of Modern **Broadcast** Receivers.—P. K. Turner, **p. 181**

The Purpose and Design of **Broadcast** Receivers, **p. 246**

Über Empfangsbeobachtungen bei Gleichwellenrundfunk (Observations on the reception of **broadcast** transmissions of the same wavelength).—F. Eppen, **p. 764**

Un Perfectionnement Intéressant d'un Montage Bien Connu (An interesting improvement of a well-known **circuit-arrangement**).—H. de Joubert, **p. 764**

The Resultant Capacity of Aerial Systems employing Series Tuning **Condensers.**—W. Griffiths, **p. 309**

High Pressure Powder **Contact Rectifiers.**—J. Lilienfeld and C. Thomas, **p. 309**

Sur les Contacts Rectifiants (On **rectifying contacts**).—H. Pélabon, **p. 372**

Sur le Contact Métal-Sulfure Cuivreux (On the metal-cuprous sulphide contact).—J. Cayrel, **p. 575**

Comparison de la Détection par Lampe et par Galène (Comparison between valve and **crystal** detection).—Bertrand, Cayrel and Masselin, **p. 117**

Les Cristaux en T.S.F. (**Crystals** in radio).—J. Vivié, **p. 246**

Neue Beobachtungen am Selbst-tönenden Kristall (New observations on the spontaneously oscillating **crystal**).—F. Seidel, **p. 246**

F. Seidel's "selbsttönender Kristall" (F. Seidel's "spontaneously oscillating **crystal**").—K. Lichtenecker, **p. 576**

Further Investigation of Synthetic Galena Detectors and a New Theory of **Crystal Rectifiers.**—W. Ogawa, C. Nemoto and S. Kaneko, **p. 764**

A Theoretical and Experimental Investigation of Detection for Small Signals.—E. Chaffee and G. Browning, **p. 308**

Nouveau Montage de Triode Détectrice à Reaction (New circuit-arrangement for a **detecting valve** with reaction).—M. Caillat, **p. 696**

Ungerichteten Empfang (**Undirectional reception**).—N. v. Korshenewsky, **p. 440**

Distortion in Broadcast Receivers, **p. 118**

Sources of **Distortion** in **Resistance Amplifiers**.—M. von Ardenne, **p. 372**

Spectre de Haute Frequence et Deformation (High frequency spectrum and **distortion**).—R. Henon, **p. 575**

La Réception par double changement de Fréquence (Reception by **double change of frequency**).—A. Cazes, **p. 372**

Electric **Dust Precipitators** and Radio Reception.—F. Muller, **p. 371**

Über die einem Empfänger durch Erdung zugeführte Energie (On the energy conducted to a receiver through the **earthing**).—A. Szekely, **p. 574**

La Soupape Electrolytique (**Electrolytic valve**).—Y. Doucet, **p. 309**

Dispositif Atténuant les Effets du Fading (Device for mitigating **fading** effects).—H. de Bellescize, **p. 444**

La Suppression des Parasites en T.S.F par les Filtres Acoustiques (Eliminating **disturbances** in wireless telegraphy by means of acoustic **filters**).—A. Nodon, **p. 180**

Étude des Filtres pour l'Alimentation des Postes de T.S.F. (Investigation of **filters** for supplying radio receivers from the mains).—R. Barthélemy, **p. 246**

Boucherot's Constant-Current Networks and their Relation to Electric Wave **Filters.**—A. Bartlett, **p. 309**

A Propos des "Filtres Acoustiques" (Concerning acoustic **filters**).—P. David, **p. 444**

Filtre Thermoionique pour l'Alimentation d'un Récepteur sur Secteur Alternatif (Thermionic **filter** for supplying a receiver from the mains).—E. Fromy, **p. 575**

Über induktive Kopplung in Empfangskreisen (On **inductive coupling** in receiving circuits).—D. v. Seelen, **p. 180**

Loud-Speaker Diaphragms.—N. McLachlan, **p. 309**

Radio **Interference.**—R. Ashbrook and R. Wight, **p. 52, also p. 180**

Location of Radio **Interference.**—B. Ellsworth, **p. 371, also p. 372**

Discussion on **Long Distance Radio Receiving** Measurements at the Bureau of Standards in 1925 (L. W. Austin).—K. Sreenivasan, **p. 306**

Discussion on **Long Distance Receiving** Measurements at the Bureau of Standards in 1925 (L. W. Austin).—G. W. Pickard, **p. 635**

The Design of a Heterodyne Type **Low Frequency Generator.**—H. Kirke, **p. 180**

The Tucker **Microphone** for Reception.—H. Watson, **p. 246**

Über moderne Musik- und Sprachübertragungsanlagen (Modern means of conveying **music and speech**).—Dr. Kühn, **p. 764**

Speech Characteristics.—G. G. F. Dutton, **p. 637**

Note sur un Nouveau Montage Neutrodyne.—F. Dufrenoy, **p. 52**

Progress in **Radio Receiving** during 1926.—A. Goldsmith, **p. 246**

A "Press" Radio **Receiver, p. 444**

A New **Receiver, p. 371**

Receiver for the Sudan Government, **p. 764**

Receiver with over 2,000 Listening Points, **p. 764**

Theory of **Receiving Aerials.**—F. M. Colebrook, **p. 764**

Alimentation des Récepteurs Radiotéléphoniques par Courant Alternatif (Supplying radio-telephone receivers with alternating current).—H. Niogret, **p. 117**

Radio Telegraph **Recorder.**—A. Jipp. **p. 309**

Rectification, pp. 117, 308, 696, 764

A new **Relay** for Morse Recording, **p. 246**

Ein neues Relais fur extrem schwache Ströme (A new **relay** for extremely weak currents).—H. Richter and H. Gaffcken, **p. 309**

High Quality **Reproduction.**—R. Denman, **p. 180**

Notes on the Design of **Resistance-**Capacity Coupled **Amplifiers.**—S. Harris, **p. 180**

A New Development in **Resistance** Amplification.—F. Colebrook, **p. 308**

Ein Beitrag zur Theorie der Niederfrequenzverstärkung mit Widerstandskopplung (A contribution to the theory of low-frequency amplification with **resistance** coupling).—H. Kafka, **p. 308**

Reristance Amplifiers, p. 372

Resistance-Capacity Amplification.—W. James, **p. 575**

Nachtrag zu der Arbeit: "Ein Beitrag zur Theorie der Niederfrequenz—verstarkung mit Widerstandskopplung" (Supplement to the paper: "A contribution to the theory of low-frequency amplification with **resistance** coupling").—H. Kafka, **p. 575**

Devising a **Shielded Receiver** Kit.—M. Silver and K. Clough, **p. 118**

Five-metre Receivers.—R. Kruse, **p. 180**

Quelques Observations Pratiques sur la Réception des Ondes Courtes (Some practical observations on the reception of **short waves**), **p. 372**

Procédé d'Elimination de l'Influence, à la Réception, des Variations de Fréquence d'un Post d'Emission à Ondes Courtes (Method of eliminating the effect at the receiver of frequency variations in a **short wave** transmitting station).—M. Veaux, **p. 575**

H.F. Amplification on **Short Waves.**—F. Charman, **p. 763**

Stereophonic Reception.—M. von Ardenne, **p. 180**

A Short-wave **Super-regenerative Receiver.**—E. Dallin, **p. 180**

Design and Construction of a **Superheterodyne Receiver.**—P. K. Turner, **p. 507**

Some Notes on the Effect of Coupling between Loop and Beating Oscillator Circuits in a **Superheterodyne Receiver.**—E. Ullrich and A. Reeves, **p. 763**

Two-range Radio-Frequency **Transformer, p. 246**

Tucker Microphone, p. 246

Developments in **Tuned Inverse Duplex.**—D. Grimes, **p. 180**

VALVES AND THERMIONICS.

Über den Formierungsprozess in Oxydkathodenröhren (On the process of **activation in valves** with oxide cathodes).—F. Detels, **p. 697**

Positive Rays Produced in Thermionic Vacuum Tubes containing **Alkali-Metal Vapours.**—H. Ives, **p. 119**

Behaviour of **Alkali-Metal Vapours** Detector Tubes.—H. Brown and C. Knipp, **p. 247**

Eine einfache Röhren-Messplatte (Simple method of obtaining valve **characteristics**).—E. Römhild, **p. 373**

Electromagnetische Stralenbundels (Electromagnetic beams).—R. Mesny, **p. 699,** also **p. 765**
Beitrag zur Kompensierung des Antenneneffektes von Peilern (Contribution to the **compensation of the antenna effect** in direction-finders).—F. Michelssen, **p. 699**
Directional Antennæ, **pp. 52, 53**
Émissions dirigées par Rideaux d'Antennes, Antennes en Greque (**Directional** emission by curtain **antennæ**; antennæ in the form of the Greek key-pattern).—R. Mesny, **p. 508**
Berechnung von Richstrahl-Antennen (Calculation of **directional** beam **antennæ**).—H. Plendl, **p. 765,** also p. **766**
Appareils Indicateurs donnant par Lecture Directe la Direction d'une Onde (Indicating apparatus from which the direction of a wave can be read off directly).—H. Busignies, **p. 639**
Remarque au Sujet des Emissions Hertziennes Dirigées (Note on the subject of **directional** Hertzian **transmission**).—A. Blondel, **p. 445**
The Possibilities of **Directional** Radio **Transmission.**—J. H. Dellinger, **p. 639**
Das Rückstrahlfeld einer Hochantenne und seine Abhängigkeit von der Frequenz (The re-radiated field of an **elevated antenna** and its dependence on the frequency).—F. A. Fischer, **p. 765**
Note sur le Calcul de la Courbe de Déviation d'un Radiogoniomètre de Bord sur les Navires de Commerce (Note on the calculation of the error curve of a radiogoniometer on mercantile ships).—M. Gouinet, **p. 118**
Über die vom Schiff hervorgerufene Funkfehlweisung und ihre Beseitigung (**Errors** in wireless **bearings** caused by the ship and their elimination).—F. Fischer, **p. 246**
The **Flying Loop.**—O. Wright, **p. 53**
Rahmen- und Goniometerpeilanordnungen (Frame and **goniometer arrangements** for obtaining bearings).—A. Esau, **p. 697**
La Boussole Hertzienne (The **Hertzian compass**).—H. Busignies, **p. 372**
Strahlungsuntersuchungen an horizontalen Sendedrähten, die in einer höheren Harmonischen erregt sind (Investigation of radiation from horizontal transmitting wires excited in a high harmonic).—G. Grimsen, **p. 52**
Richtstrahlung mit horizontalen Antennen (Directional radiation with **horizontal antennæ**).—A. Meissner, **p. 766**
A Sensitive **Long Range** Radio **Direction Finder.**—R. L. Smith-Rose, **p. 508**
Portable Radio **Direction Finder** for 90 to 7,700 kilocycles.—F. Dunmore, **p. 247**

A **Portable** Radio **Direction Finder, p. 445**
Weiterer Ausbau der Funkbeschickungstheorie (Further development of the **quadrantal error** theory).—F. A. Fischer, **p. 699**
Procédé et Appareil pour Calculer Rapidement le Point en Radiogoniométrie.—C. Ledoux, **p. 118**
Radiogoniomètres et Radiophares à Maximum Accentué.—L. Bouthillon, **p. 118,** also **p. 373, p. 639, p. 699**
Über das Peilen von Drehfeldern mit Rahmen und Hilfsantenna (Taking bearings on **rotating fields** with frame and auxiliary antenna).—F. A. Fischer, **p. 698**
Short Waves, **p. 639**
Über Rahmenpeilen mit kurzen Wellen (Taking bearings with a frame on **short waves**).—F. Michelssen, **p. 698**
Über die Peilbarkeit kurzer Wellen auf See bei Tag und Nacht (On the possibility of taking bearings on **short waves** at sea, by day and night).—F. Michelssen, **p. 699**
Der neue Telefunken-Peiler E358N (New **Telefunken** bearings-finder E358N), **p. 373**
Die Ermittelung wahrer Funkstrahlrichtungen auf Landpeilstationen (Finding the **true direction** of a radio ray with a land direction-finder).—D. Nitzsche, **p. 699**
On the Wireless **Beam** of **Short** Electric **Waves** (VII.) (A new electric **wave projector**).—S. Uda, **p. 639**

MEASUREMENTS AND STANDARDS.

A Multi-Range **Absorption** Circuit.—A. Castellain, **p. 311**
Aerial Testing.—J. Catterson-Smith, **p. 182**
Alternating Current Measuring Instruments.—K. Edgcumbe and F. Ockenden, **p. 248**
Some Recent Advances in **Alternating Current Measuring Instruments.**—K. Edgcumbe and F. Ockenden, **p. 577**
Measurements on Radio-Frequency **Amplifiers.**—R. Smith-Rose and H. Thomas, **p. 247**
Notes on the Testing of Audio-Frequency **Amplifiers.**—E. T. Dickey, **p. 699**
Analyser for Complex Electric Waves.—A. Landeen, **p. 449**
The Alternating Current Bridge as a Harmonic **Analyser.**—I. Wolff, **p. 767**
Contribution à la Realisation d'un etalon de faible Capacité (Contribution to the production of a standard of small capacity).—F. Bedeau, **p. 181,** also **p. 311**
Contribution à la Realisation d'un Etalon de faible Capacité (Contribution to the production of a standard of small **capacity**).—F. Bedeau, **p. 449**
Het Meten van Capaciteiten en het Aantoonen van Capaciteitsveranderingen (The measurement of **capacities** and indication of change of capacity).—J. W. Alexander, **p. 700**
Frequency Measurements with the **Cathode Ray Oscillograph.**—F. Rasmussen, **p. 247**
Technique of the Dufour **Cathode Ray Oscillograph** for the Study of Short Time Occurrences.—G. Harrington and A. Opsahl, **p. 311**
Some New **Coil Impedance** Diagrams.—W. Barclay, **p. 182**
The High Frequency Resistance of a Bureau of Standards type Variable Air **Condenser.**—S. Brown, C. Wiebusch and M. Colby, **p. 576**
The "Law Correction" of Variable Air **Condensers.**—W. Griffiths, **p. 576**
Ein Nomogramm zur Berechnung von Zylinderspulen (A nomogram for the calculation of **cylindrical coils**).—E. Klotz, **p. 120**
Importance of Laboratory Measurements in the **Design** of Radio Receivers.—W. MacDonald, **p. 310**
Discussion on Importance of Laboratory Measurements in the **Design** of Radio Receivers.—W. Macdonald, **p. 449**
A Calorimetric Method of Measuring **Dielectric Losses** at High Frequencies.—G. Owen, **p. 182**
Mesure des Pertes dans les Isolants en Haute et Moyenne Fréquence (Measurement of insulation **dielectric losses** at high and medium frequency).—J. Granier, **p. 638**
Note on the Measurement of **Dielectric Losses** and Permittivity at Radio Frequencies.—R. Wilmotte, **p. 638**
Signal **Fading** Measurements.—R. L. Smith-Rose, **p. 182**
An Automatic **Fading** Recorder.—T. Smith and G. Rodwin, **p. 248**
Discussion on Portable Receiving Sets for Measuring **Field Strengths** at Broadcasting Frequencies, by A. Jensen.—G. Gillett, **p. 54**
Radio **Field-Strength** Measuring System.—H. Früs and E. Bruce, **p. 119**
A New Form of **Frequency** Meter.—S. Chiba, **p. 120**
Radio-**Frequency** Measurements, **p. 182**
The **Frequency** Checking Station at Mare Island.—G. Royden, **p. 448**
Symposium on High **Frequency** Measurements.—A. Knowlton, **p. 448**
Electrical Measurements at Radio **Frequencies.**—S. Brown and M. Colby, **p. 511**
L'Etalonnage des Circuits Intermédiaires de Moyenne Fréquence dans les Postes à Changement de Fréquence (The calibration of intermediate circuits of medium **frequency** in receivers with change of frequency).—J. Quinet, **p. 638**
A Constant Frequency Source and its **Frequency** Measurement.—S. Pack, **p. 638**
High-**Frequency** Measurements.—A. Knowlton, **p. 767**
Appareil à Lecture Directe pour la Mesure des Champs Magnétiques—Gaussmètre (Direct-reading instrument for measuring magnetic fields. A **gaussmeter**).—G. Dupouy, **p. 311**
Über eine einfache Methode zur indirekten Messung von Gitterströmen (On a simple method of measuring grid currents indirectly).—M. v. Ardenne, **p. 511**
A Simple Indirect Method of Measuring **Grid Current, p. 576**
Messungen an der Bergantenne am Herzogstand (Measurements on the **Herzogstand mountain antenna**).—O. Scheller, **p. 120**
A Shielded Bridge for Inductive **Impedance** Measurements at Speech and Carrier Frequencies.—W. Shackleton, **p. 248**
Berechnung der Induktivität von Spulen (Calculation of the **inductance** of coils).—K. Müller, **p. 120**
Le Calcul des Selfs (Calculation of **inductances**).—Y. Doucet, **p. 248**
Measurement of **Inductance** by the Shielded Owen Bridge.—J. Ferguson, **p. 700**
The Relative Importance of **Losses** in Radio **Receiving Systems.**—W. Harper, **p. 120**
A new **Loss-measuring Device** and its Application to High-Frequency Measurements.—P. Cooper, **p. 311**
Loud-Speaker Characteristics.—H. Krönke, **p. 120**
Loud-Speaker Testing Methods.—I. Wolff and A. Ringel, **p. 512**
Eine Schallregistriervorrichtung zur Aufnahme der Frequenzkurven von Telephonen und Lautsprechern (A sound-registering apparatus for recording the frequency curves of telephones and **loud-speakers**).—M. Grützmacher and E. Meyer, **p. 577**
Messungen an Mikrophonen und Telephonen (Measurements on **microphones** and telephones).—C. Hartmann, **p. 248**
Telephone Transmitter **Modulation** Measured at the Receiving Station.—L. B. Turner, **p. 120**
Telephone Transmitter **Modulation** Measured at the Receiving Station.—B. van der Pol and K. Posthumus, **p. 248**
Die Graphische Dimensionierung von Elektrischen Schwingungskreisen (Finding the dimensions of electrical oscillatory circuits graphically).—E. Asch, **p. 53**
Eine Methode zur Bestimmung extrem hoher Widerstände und Kapazitäten mittels Kippschwingungen (A method for determining extremely high resistances and capacities by means of tilting **oscillations**).—E. Kurz, **p. 311,** also **p. 700**
La Mesure des Faibles Déphasages au Pont de Wheatstone (Measurement of small **phase displacements** by means of the Wheatstone bridge).—J. Granier, **p. 638**
Characteristics of the **Piezo-electric Coupler.**—Y. Watanabe, **p. 638**
Über Piezo-Elektrische Kristalle bei Hochfrequenz (On **piezo-electric crystals** at high-frequency).—A. Meissner, **p. 119**
Über piezo-elektrische Kristalle bei Hochfrequenz (On **piezo-electric crystals** at high-frequency).—A. Meissner, **p. 247**
Über Messungen an piezo-elektrischen Kristallen (Measurements with **piezo-electric crystals**).—K. Heegner, **p. 449**
Über Messungen an piezo-elektrischen Kristallen (Measurements on **piezo-electric crystals**).—K. Heegner, **p. 576**
Circuit Electrique Equivalant à un Quartz Piezo-électrique (Electrical circuit equivalent of **piezo-electric** quartz **crystals.**)—F. Bedeau, **p. 577**
Eine praktische Fassung für Piezo-Quartz-platten (A practical mounting for **piezo-electric crystals**).—V. Gabel, **p. 700**
Note on **Piezo-electric Generators** with small Back Action.—A. Hund, **p. 700**
A New Method of Obtaining Frequency Stabilisation of a Transmitter by means of an Oscillating Quartz Crystal.—C. Goyder, **p. 54**
Precise Determination of Frequency by means of **Piezo-electric Oscillators.**—J. Tykocinski-Tykociner, **p. 310**
Factors affecting the Constancy of Quartz **Piezo-electric Oscillators.**—E. Terry, **p. 310**
The **Piezo-Electric** Quartz **Resonator** and its Equivalent Electrical Circuit.—D. W. Dye, **p. 119**
The **Piezo-electric Resonator.**—Y. Watanabe, **p. 638**
Confronti fra Misuse di Frequenza, per mezzo di Piezorisuonatori (Comparison between measurements of frequency by means of **piezo-resonators**).—G. Vallauri, **p. 766**
Déformations Electriques du Quartz (Electric deformations of **quartz**).—M. Ny Tsi Ze, **p. 576**
Changements des Propriétés Optiques du Quartz sous l'influence du Champ Électrique (Changes in the optical properties of **quartz** under the influence of an electric field).—M. Ny Tsi Ze, **p. 701**
Quantitative Measurements on Reception in Radio Telegraphy.—G. Anders, **p. 448**
Notes on Radio **Receiver Measurements.**—T. Smith and G. Rodwin, **p. 512**
Das Empfangs—Überwachungsgerät der Reichs—Rundfunk—Gesellschaft (The imperial broadcast society's instrument for checking reception).—W. Reisser, **p. 577**
Quantitative Determination of Radio **Receiver** Performance.—H. D. Oakley, **p. 638**
The Absolute Measurement of **Resistance** at Radio Frequencies.—R. Wilmotte, **p. 54**

The **Resistance** of High-Frequency Circuits.—R. Ramsey, **p. 119**
The **Resistance** of Copper Wires at very High Frequencies.—W. Roberds, **p. 181**, also **p. 311**
Measurement of Earthing **Resistances, p. 311**
Messung des Widerstandes von Stromzweigen bei Durchgang von hochfrequentem Wechselstrom (Measurement of the **resistance** of current branches when traversed by high frequency alternating current).—H. Bruun, **p. 577**
High Frequency **Resistance.**—A. G. Warren, **p. 638**
Eine neue Methode zur Messung des Dämpfungswiderstandes von Schwingungskreisen (A new method of measuring the damping **resistance** of oscillatory circuits).—L. Stürmer, **p. 700**
Determining the Extremum **Scalar Value** of a Complex Quantity. —H. Boyland, **p. 576**
Shielded Oscillator for Hertzian Waves.—J. Tykocinski-Tykociner, **p. 181**
Establishment of Radio **Standards of Frequency** by the Use of a Harmonic Amplifier.—C. Jollitte and G. Hazen, **p. 53**
Standard of Frequency Transmission in Australia.—H. Stowe, **p. 182**
Zusammenfassenden Bericht. Normal Frequenzen und Absolute Frequenzmessung (Survey of the subject of **standard of frequency** and absolute measurement of frequency).—A. Scheibe, **p. 511**
Standards of Frequency Dissemination.—M. S. Strock, **p. 700**
" Universal " Frequency Standardisation from a Single Frequency Standard.—J. K. Clapp, **p. 766**
Die Wahrscheinlichkeitsrechnung in der Fernsprechtechnik (Calculation of probability in **telephone** technique).—F. Lubberger, **p. 248**
Telephone, **p. 248**
Etalonnage direct d'un Ondemètre en Fonction des Harmoniques d'un Diapason (Direct calibration of a **wavemeter** in terms of the harmonics of a **tuning-fork**).—F. Bedeau and J. de Mare, **p. 512**
Distortion of Resonance Curves of Electrically-Driven **Tuning Forks.**—E. Mallett, **p. 699**
On the Control of the Frequency of Flashing of a Neon Tube by a Maintained Mechanical **Vibrator.**—W. A. Leyshon, **p. 637**
The Delineation of Alternating Current **Wave Forms.**—H. A. Thomas, **p. 120**
The Exact and Precise Measurement of **Wavelength** in Radio Transmitting Stations.—R. Braillard and E. Divoire, **p. 448**
The Exact and Precise Measurement of **Wavelength** in Radio Transmitting Stations.—R. Braillard and E. Divoire, **p. 511**
An Improvement on the " Double Click " method of measuring the Resonant **Wavelength** of a Circuit, **p. 512**
La Mesure exacte et précise des Longuers d'onde dans les Stations d'Émission (Precise measurement of the **wavelengths** of transmitting stations).—R. Braillard and E. Divoire, **p. 700**
A Short-Wave Precision **Wavemeter, p. 182**
Absorption **Wavemeter.**—H. Dent, **p. 512**, also **p. 577**

SUBSIDIARY APPARATUS.

Wireless Auto-**Alarm Devices, p. 639**
Automatic Wireless **Alarm Devices, p. 767**
Le Fonctionnement des Ampèremètres Thermiques en Haute Frequence.—J. Granier, **p. 54**
Remote Indicating Aerial **Ammeter.**—A. P. Castellain, **p. 639**
Ton frequenz-Wechselstromgenerator (Audio frequency **alternating current generator**).—G. Lubszynski, **p. 449**
Battery Eliminators, p. 376
Battery Eliminators, or Appliances for the Operation of Radio Receiving Apparatus by Energy derived from Electric Supply Mains.—P. Coursey and H. Andrewes, **p. 578**
Radio **Battery Eliminators.**—P. Tyers, **p. 639**
Neutralisation of the Deflecting Field in a **Braun Tube** with External Electrodes.—L. Jones and A. Cravath, **p. 577**
Über die Wirkungsweise der Konzentrierungsspule bei der Braunschen Röhre (On the manner of working of the concentrating coil in the **Braun tube**).—H. Busch, **p. 767**
A **Break-In Relay.**—M. Brainard, **p. 120**
The Oscilloscope: a Stabilised **Cathode-Ray Oscillograph** with Linear Time-Axis.—F. Bedell and H. Reich, **p. 638**
Ein neue Bauart des Kathodenoszillographen (A new method of constructing **cathode oscillographs**).—W. Rogowski, E. Flegler and R. Tamm, **p. 767**
A Device to draw **Characteristic Curves** of Vacuum Tubes automatically.—G. Campbell, **p. 638**
Condensers, **p. 54**
The Logarithmic **Condenser.**—F. Haynes, **p. 450**
Comparaison des Divers Types de Condensateurs Variables (Comparison between the different types of variable **condensers**).—C. Reinewald, **p. 639**
A High Voltage **Direct Current Generator.**—S. Mackeown, **p. 182**
Dry Batteries for Radio Purposes, **p. 182**
Sur une Disposition de Cage de Faraday pour Radiotélegraphie (On a **Faraday Cage Arrangement** for W.T.).—MM. Beauvais and Mesny, **p. 577**
H.T. **Filter Circuits** for D.C. Mains.—J. Owen Harries, **p. 700**
Gleichstrom-Hochspannungsmaschinen als Anodengeneratoren (Direct current **high tension machines** for supplying the anodes of valve transmitters).—E. Rappel, **p. 767**
On the Design of **Inductance** Coils for Audio-Frequencies having an Iron Core with an Air Gap.—H. Nukiyama and K. Nagai, **p. 695**, also **p. 767**
" Insulators," **pp. 120, 450**
" Kenotron," p. 512
Loud-Speakers, **p. 182**
Loud-Speaker Design.—N. McLachlan, **p. 376**
Les Haut-parleurs à grande puissance de l'Exposition de Berlin (Powerful **loud-speakers** at the Berlin Exhibition, **p. 449**
Coil-Driven **Loud-Speaker** with Permanent Magnets.—H. Lloyd, **p. 450**
A Radio-Telephone **Loud-Speaker.**—E. Braendle, **p. 512**
Loud-Speaker Inefficiency.—N. McLachlan, **p. 578**
Loud-Speaker Diaphragms.—N. W. McLachlan, **p. 701**
The Kone **Loud-Speaker.**—S. Hill, **p. 701**
Motional Impedance Test of **Loud-Speakers.**—K. Kurokawa and T. Hirota, **p. 768**
H.T. and L.T. from a 250-volt **D.C. Supply.**—A. Robertson, **p. 182**
L.T. and H.T. **Supply from D.C. Main.**—A. Robertson, **p. 450**
H.T. from the **Mains.**—H. Kirke, **p. 578**
Das Schalten grosser Leistungen mit Quecksilberdampfröhren in der drahtlosen Telegraphie (The control of large outputs in wireless telegraphy with **mercury vapour tubes**).—H. Schuchmann, **p. 767**
A Revolutionary Development in **Mica** Insulation.—L. Barringer, **p. 120**
Aufnahme-Mikrophone für den Rundfunk (**Microphones** for broadcast transmission).—F. Weichart, **p. 120**
The Acoustic Problems of **Microphones and Loud-Speakers, p. 182**
Grundlegendes zu Untersuchungen an Mikrophonen (Principles of **microphone** investigation).—G. Schubert, **p. 376**
The Hot-Wire **Microphone** and Audio-Resonant Selection.—G. Blake, **p. 578**
Electromagnetic **Microphone.**—I. Koga, **p. 767**
Mikrophone für hochwertige Übertragung (**Microphones** for high quality transmission).—C. A. Hartmann, **p. 767**
Magnetic **Permeability of Iron** in High Frequency Alternating Fields.—G. Wait, **p. 54**
Gramophone **Pick-up Devices.**—G. Sutton, **p. 578**
Neues über Rundfunkaufnahmen (New information on broadcast **" pick-up " devices**).—W. Schäffer, **p. 767**
Selective Morse **Recording.**—G. C. Blake, **p. 638**
A Simple Theory of Kenotron **Rectifiers** Circuit.—S. Kanazawa, **p. 512**
Étude Electrique de quelques Redresseurs (Electrical investigation of some **rectifiers**).—J. Quinet, **p. 767**
Relays, **pp. 54, 120**

Undamped **Extra-short Waves** obtained with the Magnetron.—K. Okabe, **p. 768**

The Effect of Wavelength on the Differences in the Lags of the **Faraday Effect** behind the Magnetic Field for various Liquids.—F. Allison, **p. 641**

Contemporary Advances in Physics—XIII. **Ferromagnetism.**—K. Darrow, **p. 447**

A Study of the Regular Combination of Acoustic Elements, with Applications to Recurrent Acoustic **Filters,** Tapered Acoustic Filters, and Horns.—W. Mason, **p. 447**

On the Sparking Potentials of **Glow Discharge-Tubes.**—J. Taylor, **p. 510**

A Theory of the **Gravitational Field** in the Light of Maxwell's Theory.—C. Venkata Row, **p. 702**

Theory of the Magnetic Nature of **Gravity.**—C. Sagui, **p. 312**

Sur le Calcul de la Chaleur Dégagée par les Courants de Haute Fréquence (Calculation of the **heat liberated** by high frequency currents).—C. Fabry, **p. 768**

Über die Dämpfung von kleinen Hertzschen Vibratoren (On the damping of small **Hertzian vibrators**).—W. Arkadiew and A. Leontiewa, **p. 249**

Properties of **High Frequency Radiations.**—J. Gray, **p. 121**

On the Question of the Existence of **Induction Effects** from suddenly stopped Electrons, predicted by the Classical Theory.—S. Milner and J. Hawnt, **p. 447**

Insulators and **Insulation.**—J. Strachan, **p. 640**

Influence de la Fréquence sur les Pertes dans les Isolants (Influence of the frequency on **insulation** losses).—J. Granier, **p. 640**

A Continuous **Integraph.**—V. Bush, F. Gage and H. Stewart, **p. 249**

Ionisation by Collision.—H. Huxley, **p. 447**

Ionisation by Collisions of the Second Kind in the Rare Gases.—G. Harnwell, **p. 510**

Ionisation by Collisions of the Second Kind in Mixtures of Hydrogen and Nitrogen with the Rare Gases.—G. Harnwell, **p. 578**

Ionisation by Collisions of the Second Kind in Mixtures of Hydrogen and Nitrogen with the Rare Gases.—G. Harnwell, **p 640**

Light-Quanta and Maxwell's **Equations.**—N. Rashevsky, **p 702**

The Direct Comparison of the **Loudness of Pure Tones.**—B. Kingsbury, **p. 312**

A Direct Comparison of the **Loudness of Pure Tones.**—B. Kingsbury, **p. 446**

Magnetic Induction in Continuous Media.—C. Burch and N. Ryland Davis, **p. 312**

Peut-on Déceler Directement le Moment Magnétique de l'Electron ? (Is it possible to find the **magnetic moment** of the electron directly ?)—L. Brillouin, **p. 249**

L'Influence des Actions Mécaniques et des Courants Alternatifs sur les Discontinuités d'Aimantation du Fer (The effect of mechanical action and alternating current on the discontinuities in the **magnetisation of iron**).—S. Procopiu, **p. 509**

Bruissement dans l'Aimantation du Fer (Acoustical phenomena accompanying the **magnetisation of iron**).—W. Arkadiew, **p. 509**

Magnetisation Properties of Iron in High Frequency Alternating Current Fields.—J. Martin, **p. 641**

The Application of the Method of the **Magnetic Spectrum** to the Study of Secondary Electronic Emission.—C. Sharman, **p. 509**

" Magnetron," pp. 640, 768

Maximisation Methods for Functions of a Complex Variable.—W. van B. Roberts, **p. 641**

Secondary Electron Emission from **Molybdenum.**—A. Hull and J. Hyatt, **p. 183**

Optimum Conditions for **Music** in Rooms.—F. Watson, **p. 249**

Luminescence from Solid **Nitrogen,** and the Auroral Spectrum.—L. Vegard, **p. 121**

Zür Frage des Vorhandenseins von Festem Stickstoff in der Erdatmosphäre (On the question of the presence of solid **nitrogen** in the earth's atmosphere).—H. Pelzer, **p. 640**

Die Lautstärke von zusammengesetzten Tönen und Geräuschen (The intensity of composite notes and **noises**).—H. Barkhausen and H. Tischner, **p. 578**

Optique et Radioelectricité (**Optics and Wireless**).—L. Bouthillon, **p. 120**

Optique et Radioélectricité (**Optics** and Wireless).—L. Bouthillon, **p. 446**

Measurements of the Amount of **Ozone** in the Earth's Atmosphere and its Relation to other Geophysical Conditions—Part II.—G. Dobson, D. Harrison and J. Lawrence, **p. 374**

Yearly Variation of the Quantity of **Ozone** in the Upper Atmosphere. F. Goetz, **p. 509**

Sur la Perméabilité du Fer aux Fréquences Elevées (On the **permeability of iron** at high frequencies).—C. Gutton and I. Mihal, **p. 509**

Magnetic **Permeability of Iron** and Magnetite in High Frequency Alternating Fields.—G. Wait, **p. 447**

Demonstration of Selenium Cells.—H. Thirring, **p. 183**

The Characteristics of Gas-filled **Photo-electric Cells.**—N. Campbell, **p. 374**

The Use of Gasfilled **Photo-electric Cells.**—N. Campbell, **p. 447**

On the Total **Photo-electric Emission** of Electrons from Metals as a Function of Temperature of the Exciting Radiation.—S. Roy, **p. 122**

Photo-electric Emission as a Function of Composition in Sodium-Potassium Alloys.—H. Ives and G. Stilwell, **p. 248**

Photo-electric Emission as a Function of Composition in Sodium-Potassium Alloys.—H. Ives and G. Stilwell, **p. 374**

The Instantaneity of the **Photo-electric Emission** Effect.—E. Lawrence, **p. 640**

The Velocity and Number of the Photo-Electrons ejected by X-rays as a function of the Angle of Emission.—E. C. Watson, **p. 769**

Sur les Variations des Propriétés Optiques du Quartz Piézo-Electrique Soumis à des Courants de Haute Fréquence (On the variations of the optical properties of **piezo-electricity** quartz subjected to high-frequency currents.—E. Taivil, **p. 121**

Piezo-electricity of Crystal Quartz.—L. Dawson, **p. 182**

Sub-fundamental **piezo-electricity** Vibrations in Quartz Plates.—J. Harrison, **p. 311**

Über piezo-electrische Kristalle bei Hochfrequenz, II. (On **piezo-electricity** crystals at high frequency, II.—A. Meissner, **p. 311**

Piezo-Electricity of Crystal Quartz.—L. Dawson, **p. 445**

Theory and Application of Low Frequency **Piezo-electricity Vibrations** in Quartz Plates.—J. Harrison, **p. 446**

Piezo-Electricity Crystals at Radio Frequencies.—A. Meissner, **p. 446**

Quelques Observations faites sur le Quartz Piézo-électrique en Résonance (Some observations on resonant **piezo-electricity** quartz).—E. Taivil, **p. 701**

A **Quantum Theory** Relation in large Scale Electric Wave Phenomena.—T. Eckersley, **p. 249**

The **Quantum Theory** of the Emission and Absorption of Radiation.—P. Dirac, **p. 312**

A Contribution to Modern Ideas on the **Quantum Theory.**—H. Flint and J. Fisher, **p. 510**

The Physical Reality of Light Quanta.—M. Planck, **p. 640**

La Structure Atomique de la Matière et du Rayonnement et la Mécanique Ondulatoire (The atomic structure of matter and **radiation** and undulatory mechanics).—L. de Broglie, **p. 248**

The Calibration and Performance of the **Rayleigh Disc.**—E. Barnes and W. West, **p. 701**

Theories of a New Solid Junction **Rectifier.**—L. Grondahl, **p. 121**

A New Electronic **Rectifier.**—L. Grondahl and P. Geiger, **p. 447**

Die Reflexion elektromagnetischer Wellen an ferromagnetischen Oberflächen (The **reflection of** electromagnetic **waves** at ferromagnetic surfaces).—W. Arkadiew, **p. 248**

Die Reflexion Hertzscher Wellen an ferromagnetischen Drahtgittern (The **reflection** of Hertzian **waves** at ferromagnetic wire gratings).—W. Arkadiew, **p. 248**

The Electrical **Resistivity** of Insulating Materials.—H. Curtis, **p. 768**

The Temperature Variation of the Elasticity of **Rochelle Salt.**—R. Morgan Davies, **p. 701**

Insulation and **Short Waves.**—C. Forbes-Buckingham, **p. 640**

Untersuchung über die Hautwirkung in Eisendrähten (Investigation on the **skin effect** in iron conductors).—K. Mittelstrass, **p. 768**

Methoden und Ergebnisse der Klanforschung (Methods and results of **sound** research).—F. Trendelenburg, **p. 54**

Power of Fundamental Speech **Sounds.**—C. Sacia and C. Beck, **p. 121**

Dynamical Study of the Vowel **Sounds.**—H.—I. Crandall, **p. 249**

The Performance and Design of the **Sound** Radiator, Consisting of the Acoustic Transformer and the Horn.—K. Kobayashi, **p. 249**

Über die Messung der Geschwindigkeitsamplitude und der Druckamplitude in Schallfeldern (On the measurement of the velocity and pressure amplitude in **sound** fields).—E. Meyer, **p. 312**

Light-transmitted **Sound** by Modulation of Mercury-arc Radiation.—D. Stickbarger, **p. 510**

On the Propagation of **Sound** in the General Bessel Horn of Infinite Length, **p. 578**

Über die Richtwirkung von Schallstrahlern (On the directivity of **sound** radiators).—H. Stenzel, **p. 578**

The **Sun** as a Research Laboratory.—G. E. Hale, **p. 640**

Thermal Agitation of Electricity in Conductors.—J. Johnson, **p. 183**

Thermal Agitation in Conductors.—H. Nyquist, **p. 447**

Neue Kunstgriffe in der Vacuumtechnik (New artifices in **vacuum technique**).—M. Schirmann, **p. 182**

Water Vapour in the Atmosphere.—E. Gold, **p. 374**

A Possible Connection between the **Wave-Theory** of Matter and Electro-Magnetism.—H. Bateman, **p. 121**

Wave Theory Mechanics and Classical Mechanics and Electrodynamics.—G. Schott, **p. 510**

Over de Ondulatietheorie van een Deeltige, zijn Uitgestrektheid en zijn Bestendigheid (On the **wave theory** of a particle, its extent and permanence).—A. Fokker, **p. 769**

MISCELLANEOUS.

An **Analyser** for the Voice Frequency Range.—C. Moore and A. Curtis, **p. 450**

Two-way Communication with the **Antarctic.**—W. Brown, **p. 251**

Wireless **Beam** Stations, **p. 641**

Bolivian Telegraphs, **p. 450**

Regular Broadcast Transmissions, **p. 512**

The Organisation and Problems of National **Broadcasting.**—A. N. Goldsmith, **p. 579**

The Distribution of **Broadcasting** Stations.—P. P. Eckersley, **p. 579**

Die Betriebs-Zentrale der Transradio A.-G. für drahtlosen Überseeverkehr (Headquarters of the joint-stock company Transradio for wireless **communication** overseas).—E. Quäck, **p. 183** and **p. 250**

Wireless Telegraph **Communication.**—Lieut.-Col. Chetwode Crawley, **p. 450**
Report of Committee on Electrical **Communication** for the past Institute Year.—H. P. Charlesworth, **p. 641**
Carrier Current **Communication over Transmission Lines.**—E. Carter, **p. 122**
Telephone **Communication over Power Lines** by High Frequency Currents.—C. A. Boddie, **p. 642**
The Use of High Frequency Currents for **Control.**—C. A. Boddie, **p. 642**
La Determination des Differences de Longitude par Télégraphie sans Fil.—L. de la Forge, **p. 55**
Some Developments in the **Electrical Industry** during 1926.—J. Liston, **p. 250**
British **Export Figures** of Radio Apparatus, including Valves, **p. 376**
France—Control Plan, **p. 184**
Making Synthetic **Galena.**—G. Tatham, **p. 579**
Germany—Radio Telephony, **p. 641**
The B.E.S.A. **Glossary.**—G. W. O. Howe, **p. 55**
The B.E.S.A. **Glossary.**—G. W. O. Howe, **p. 122**
Glyptal.—H. Warren, **p. 313**
A Combined Radio **Gramophone Installation.**—A. Dinsdale, **p. 769**
Uber die Rückwirkung des Menschlichen Körpers auf Sender und Empfänger bei kurzen Wellen (The reaction of the **human body** on transmitter and receiver with short waves).—N. Skritzky and W. Lermontoff, **p. 54**
" Karolus Cell," **pp. 122, 376**
La Téléphonie sans Fil par Ondes Lumineuses.—M. Chauvierre, **p. 55**
La Téléphonie sans Fil par Ondes Lumineuses (Wireless telephony by **luminous waves**).—M. Chauvierre, **p. 642**
Past and Present : A Few **Notes, p. 250**
Wireless **Notes, p. 642**
Electrical Reproductions from **Phonograph Records.**—W. Kellogg, **p. 769**
Bildübertragung und Schnelltelegraphie (**Picture** transmission and high-speed **telegraphy**).—F. Schröter, **p. 55**
Bildtelegraphie und Schnelltelegraphie mit der Karolus-Zelle (**Picture** and high-speed **telegraphy** with the **Karolus cell**).—F. Schröter, **p. 122**
Photctelegraphy.—T. Thorne-Baker, **p. 313**
Die Umwandlung eines Bildes in elektrische Telegraphierzeichen (Converting a **picture telegraphy** into electrical signs for telegraphing).—O. Schriever, **p. 376**
Commercial **Picture** Telegraphy Transmission.—A. Dinsdale, **p. 376**
Die Fortschritte der Bildtelegraphie Telefunken-Karolus-Siemens (Progress of **picture telegraphy** on the Telefunken **Karolus** Siemens method).—F. Schröter, **p. 376**
Der Empfang bildtelegraphischer Sendungen (The reception of **picture telegraphy**).—Dr. Illberg, **p. 769**
Poland—Radio Communication, **p. 183**
Portugal—New Wireless Telegraph Service, **p. 184**
Preferred Numbers.—L. Hazeltine, **p. 184**
Wireless **Progress.**—C. L. Fortescue, **p. 55**
Fifty Years' **Progress** in Electrical Communications.—M. Pupin, **p. 313**
A Radio Inter-communicating System for **Railroad** Train Service.—H. C. Forbes, **p. 769**
La Nouvelle Réglementation de la T.S.F. (New **regulations** of wireless telegraphy), **p. 251**
France—New **Regulations, p. 376**
Russia—Long Distance Telephony, **p. 641**
A Tour round **Savoy Hill.**—A. West, **p. 251**

A Wireless **Works Laboratory.**—P. K. Turner, **p. 512**
A Wireless **Works Laboratory.**—P. K. Turner, **p. 700**

NOTE.

THIS index to the past volume, including an index to Abstracts and References, has been compiled in response to a number of requests, and it was found that the most convenient way in which to produce it was to include it as we have done in the present number so that it will reach all readers. Will readers kindly note that for binding purposes this index can be easily detached from the issue by opening up from the back of the cover the staples which hold the pages in place. The complete index can then be slipped off and the staples bent back into place so as to hold the issue together.

We are asked by the publishers to announce that **Cloth Binding Cases** for Volume IV are now available, price **3s. 3d.** post free, from ILIFFE & SONS, LTD., Dorset House, Tudor Street, London, E.C.4.

Complete volumes bound in cloth with index can also be had at the following prices :—

Volume I	...	...	...	**£1 : 6 : 0**
„ II	...	...	...	**£1 : 10 : 6**
„ III	...	...	...	**£1 : 6 : 0**
„ IV	...	...	...	**£1 : 13 : 6**
